14:00-15:30

1033 SE Main St.
Portland

**Systemic Approach to Green Transition in
Denmark**

The presentation explores Denmark's pioneering systemic approach to the green transition, emphasizing the profound shifts in thinking and practices that have elevated the nation as a sustainability leader. Denmark's unique strategy involves coupling sectors, transforming traditional roles of producers and consumers, and reimagining resources and waste streams, all of which have significantly enhanced efficiency, flexibility, and resilience in the journey towards a sustainable future. The presentation will highlight the focus on public-private partnerships, the integration of renewable energy sources, smart grid technologies and frameworks promoting industrial symbioses.

Led by: Claus Krog Ekman - Energy Attache,
Ministry of Foreign Affairs of Denmark
claeqm@um.dk

13:30-17:00

Wednesday, October 11

Portland & Tri-Cities

09:00-10:30 Technical Screening Follow Up

1810 SW 5th
Ave. Portland

09:00-10:30 Cooperation Agreement Working Group

1810 SW 5th
Ave. Portland

The goal of the cooperation agreement is to form a working group to bring symbiosis to the Americas. In the working group we will agree to 1) become a working group; 2) plan for an Industrial Symbiosis conference in 2024; 3) continue to work together to learn and grow together in our approach and use of symbiosis
